Deksmart Project Profile

Deksmart Product
68mil Ivy Green

Completion Date
August 2014

Location
Victoriaville, QC

Overview

This residence has a multi-level back yard sundeck that was in need of repair. The deck had a fiberglass coating that was cracking along the plywood joints that eventually allowed water to penetrate and cause extensive damage to the deck. After the structure and the subfloor were repaired, new Deksmart Ultra 68mil Ivy Green was installed to both deck surfaces and the stair treads, with new railings and cedar cladding to finish the look.
