Intellideck Project Profile

Intellideck Product
68mil Silver Maple

Completion Date
July 2016

Location
New York

Overview

This waterfront location in upstate New York features fabulous views, but falls victim to relentless cycles of wind and rain in the region. With a view this beautiful and so little time to enjoy it, this home was in need of an attractive decking product that would act as an integrated waterproof system, keeping the area below the deck dry. The home owner anxiously awaited the launch of the redesigned Skai® Intellideck Silver Maple cool colors® pattern, and the job was completed by Grant Barlow, owner of Great Construction Solutions and Intellideck's own certified waterproofing trainer.

This home was one of North America's first looks at the Intellideck Silver Maple design, which is now available in Canada exclusively through Deksmart Vinyl Products.
