

## SC-1022 Contact Adhesive

HB Fuller SC-1022 is a high quality solvent based cold-weather adhesive designed for fabric backed vinyl decking membranes. This adhesive can be applied to flat or vertical surfaces and has excellent grab on wood, concrete, and metal flashings. The SC-1022 is considered a “winter grade” adhesive, and has characteristics and properties that allow it to be used in colder temperatures than most standard vinyl decking adhesives.

### Features

- Outstanding grab characteristics
- Able to be used in colder temperature installations
- Excellent adhesion to many substrates
- Fast curing times
- Compatible with all polyester backed Deksmart membranes

### Technical Notes

- Install at temperatures above -3 degrees celsius
- Applied to substrate and Deksmart membrane
- Coverage 400 square feet per pail
- Mix well before use
- Do not freeze
- 1 year shelf life
- Refer to MSDS documents before use

### Packaging

- Single pail 18.9L (35 lbs.)
- 24 pail full skid
- Packaging Group II
- Primary Class 3
