Deksmart Project Profile

Deksmart Product
68mil Beachwood Plank

Completion Date
July 2015

Location
Calgary, AB

Overview

A very popular trend in construction today is turning a flat-roof carport or garage into a useable outdoor space, providing additional living space while adding value to the home. This residence in Calgary Alberta was originally constructed with a traditional tar & gravel roof over top of it's garage. Utilizing Sundeck Solutions' expertise in remediation construction and waterproofing these homeowners were able to turn this once unused space into a gorgeous vinyl sundeck with Deksmart's Ultra 68mil Beachwood Plank.
