

PVC SmartClip / Galvanized Flashing

The Deksmart PVC SmartClip offers an integrated outside perimeter drip edge detail system. Galvanized flashing is installed to the substrate prior to the Deksmart membrane installation, with the membrane being wrapped continuously over the deck edge and mechanically fastened with a PVC terminating SmartClip that snaps on to the flashing drip edge safety return.

Features

- Snap hook design that secures to flashing safety return edge
- Multiple flashing thicknesses and profiles available
- Continuous membrane to drip edge
- Sleek design
- Hemmed edge return offers increases stability
- Compatible with all polyester backed Deksmart membranes
